

weber.ad 782

Waterproofing admixture

Water-repellent agent for mortars and renders

Fields of application

For the production of water-repellent mortars and renders. It blocks the capillaries and pores of mortars to provide a barrier against liquid water.

Description

weber.ad 782 is a normal-setting liquid waterproofing admixture for mortars and renders.

Composition

Modified, water-repellent, plasticized active ingredients

Main features

- hydrophobic
- plastifying effect on the cement mix
- prevents segregation of mortars/renders in plastic state
- increases the frost/thaw salt resistance of hardened mortars/renders
- increases the water impermeability of mortars/renders
- ready-to-use
- chloride-free

Technical values

Application temperature:	> -2°C
Density:	approx. 1 kg/dm ³

Quality control

weber.ad 782 is subject to a regular quality control.

Working instructions

- Stir weber.ad 782 briefly before use.
 - Add the product to the mixing water when mixing the mortar.
 - Carry out a suitability test on trial mixes to determine the exact dosage.
-

Practical information

Colours:

white

Storage:

The product can be stored at least 12 months in its original unopened packaging, if kept dry and frost-free.

Consumption / yield

per kg binder: approx. 10 - 20 ml

Packagings

Type	Sales unit	Number / euro-pallet
Plastic can	2.5 kg	150 cans
Plastic can	10 kg	60 cans
